POWERED BY BRITS NONWOVEN

ZERO WASTE SOLUTION

2025 FLOORING BROCHURE

LEADERS IN SPECIALIST NONWOVENS WITH EXTENSIVE EXPERIENCE & ACCREDITATION

WHO WE ARE

Brits Nonwoven is a group company of Deneb Investments Limited, a subsidiary of Hosken Consolidated Investments Ltd (HCI).

Deneb is strategically divided into three segments: Manufacturing, property and branded product distribution. Their manufacturing division, which includes Brits Nonwoven, covers a wide range of mainly industrial products for the mining, agricultural, construction, automotive, medical, hospitality and retail markets.

MANUFACTURING

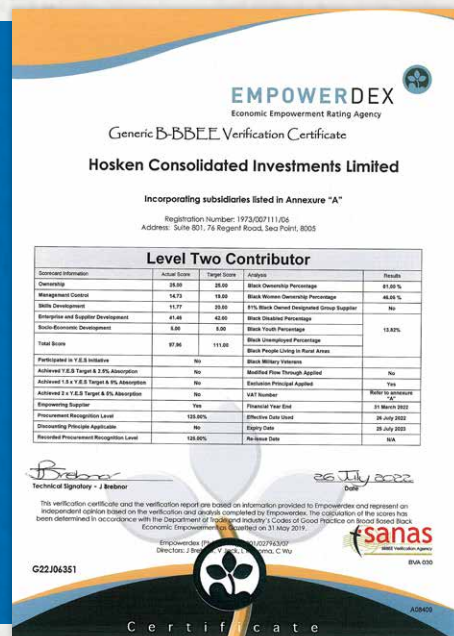

PRODUCT DISTRIBUTION

PROPERTY

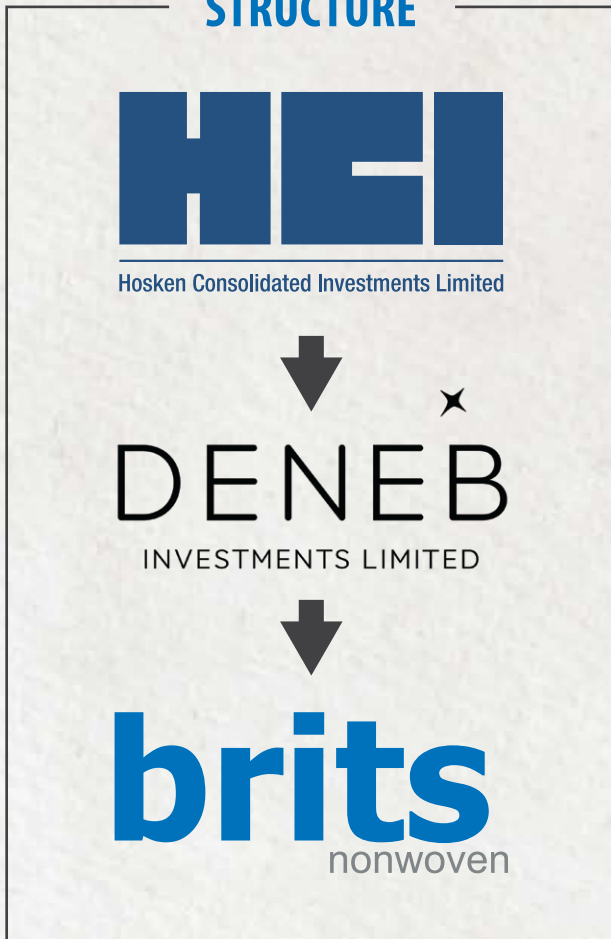

Brits Nonwoven is a proud Level 2 Broad-Based Black Economic Empowerment contributor.

- 69% black owned
- 39% black woman owned
- Wholly owned by Hosken Consolidated Investments Limited (HCI), a black empowerment investment holding company which is listed in the financial sector on the JSE Securities Exchange South Africa
- HCI's major shareholder is the South African Clothing and Textile Workers Union

Listed on the Johannesburg Stock Exchange, HCI is a leading broad-based black empowerment investment company with an impressive portfolio of interests in several industries

STRUCTURE

HCI INTERESTS

OUR SOCIAL IMPACT

The HCI Foundation is an independent trust, controlled by trustees. These include members of the HCI Board of Directors, employees from subsidiary companies of HCI, and independent experts who are able to add value to the specific foci of the Foundation's work.

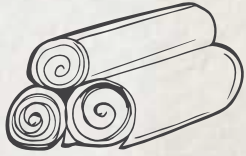

The HCI Foundation aims to bring about change and make a sustainable impact in underdeveloped and underprivileged communities, through initiatives such as bursaries for tertiary education students, youth skills development programmes and more.

ZERO WASTE SOLUTION

In today's increasingly environmentally conscious world, all industries face a growing pressure to adopt sustainable practices. Recycling waste products generated during all stages of the manufacturing operations presents valuable opportunities for all partners to align with sustainability goals, while enjoying a range of tangible benefits.

HOW WE MAKE IT

Our recycled textile waste fibre is the product of a process built around the prevention of textile to landfill.

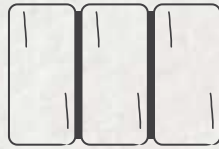

Sourcing

Textile waste is sourced from textile manufacturing plants throughout South Africa.

Tearing

Impurities are removed during the recycling process, allowing for the recovery of various grades of textile fibres.

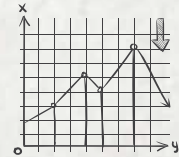

Baling and quality control

We monitor each step in our manufacturing process to ensure the finished fibre meets customer requirements.

Value

We create value for our clients through the systematic elimination of waste.

ESG reports

We improve our clients' performance and disclosure with certified landfill reduction.

REDUCE PLASTIC

Most products containing thermoplastics cannot be recycled and will never break down completely. This results in microplastic accumulating in landfills, oceans, soils, and eventually in our bodies and the air we breathe.

RESOURCE CONSERVATION

Recycling conserves valuable raw materials by reducing the need for virgin resources. This is particularly relevant for textile products, which are energy and water intensive to produce.

RECYCLING WORKS BEST

We have built recycling capacity to prevent textile waste from going to landfills.

ENVIRONMENT FRIENDLY

Landfill sites are unable to handle PE/PP textile waste, so they are collected and recycled at Brits Nonwoven.

Brits Nonwoven recycles around 2 000 000kg of textile waste every year.
